Education

UPES, Dehradun

B.Tech C.S.E AI/ML

Aug 2023 – May 2027

7.7 CGPA

Professional Summary

Software Engineer who builds and ships end-to-end systems — multi-tenant backends, REST APIs, desktop applications, and browser extensions across Python, Java, and JavaScript. Comfortable owning architecture, databases, auth, and CI/CD from design to deployment.

Professional Experience

IBM

AI/ML Intern

June 2026 – July 2026

Live: undebuggedbit-chimera-fd.hf.space

- Architected a multi-tenant B2B platform end-to-end — FastAPI, Next.js 15, Postgres, JWT/bcrypt auth, single-image Docker, dual-remote CI/CD — enforcing tenant isolation via router dependencies and an integration test suite.
- Built and deployed CHIMERA-FD, a live cascaded fraud-detection service handling 3M held-out rows with zero engine errors at 92.13% accuracy.

Notebrain Software & Services Pvt. Ltd

AI/ML Intern

Aug 2025 – October 2025

- Built and integrated a prediction service into a production web application, owning the pipeline from data ingestion through model serving.
- Worked in an agile team on iterative tuning and data-quality fixes across multiple sources to improve output reliability.

Venture Launcher

AI/ML Intern

June 2025 – July 2025

- Built a prototype matching engine as a proof of concept for the founding team.
- Ran data cleaning, feature identification, and exploratory analysis to support the matching system.

Projects

Smart City Guide — Java Swing Desktop Application | [Releases V1.0](#)

- Built a 4-layer Java Swing app (Presentation/Navigation/Services/Data Access) over a 7-table MySQL schema via JDBC with clean OOP separation, secure PBKDF2-HMAC-SHA256 auth, and prepared-statement queries that close the SQL-injection surface.
- Designed a self-bootstrapping first-run flow (auto-creates schema, seeds data) and packaged v1.0 as a Windows installer with bundled JRE via jpackage — zero manual setup.

SurfVigil — Real-Time Browser Threat Detection Extension | [Extension link](#)

- Built a Chrome extension (Manifest V3) + FastAPI backend, deployed on Hugging Face Spaces + Neon Postgres and published to the Chrome Web Store.
- Diagnosed and patched three silent backend failures returning HTTP 200 with wrong results (version drift, dict-key mismatch, bad API kwarg), restoring correctness and cutting the false-positive rate from ~65% to ~0%.

Conversational Assessment Recommender (Agentic RAG) | [Live Demo](#)

- Built a stateless, provider-swappable (Groq/Gemini) FastAPI service backing a multi-turn conversational recommender, Dockerized on Hugging Face Spaces.
- Added a server-side grounding guardrail and an automated eval harness scoring schema compliance and Recall@10 across conversation traces.

Rice Leaf Disease Detection System | [Website](#)

- Deployed a two-stage image-classification ensemble as a REST service (PyTorch + Flask, Docker) on Hugging Face Spaces with sub-2s inference.
- Optimized the pipeline from 6 to 5 models, cutting inference time 16%.

Technical Skills

Languages: Python, Java, JavaScript, TypeScript, SQL, HTML, CSS

Core CS: Data Structures, Algorithms, OOP, DBMS, System Design (REST, multi-tenancy), Version Control

Backend & Databases: FastAPI, Flask, SQLAlchemy, REST APIs, JWT/bcrypt auth, PostgreSQL, MySQL, MongoDB

Frontend: Next.js 15, TypeScript, HTML/CSS

Tools & Platforms: Git/GitHub, Docker, GitHub Actions (CI/CD), JDBC, jpackage, Hugging Face Spaces, Chrome Extension APIs (Manifest V3)

ML/AI: PyTorch, scikit-learn, LightGBM, XGBoost, RAG/LLM Agents, Pandas, NumPy

Position of Responsibility

Core Member – UPES ACM & ACM-W Student Chapters

- Served as Program Head for *ICPC Code Nexus*, managing logistics and tech ops.
- Awarded Certificate of Appreciation for excellent execution and contribution.

Social Outreach Intern — Shri Brahma Ji Siksha Avam Samaj Kalyan Samiti (May 2024 – July 2024)

- Coordinated education and environment awareness drives across 30+ communities, conducting 150+ field surveys.
